Champion Meat Market

OBITUARY

The late Charles Eric Anderson was born in Motila, Sweden, on April 17th, 1884. In 1906 he was united in marriage to Bertha Clive Anderson Ostewig, moving the same year to Illinois where he resided until 1912 when he arrived in Lethbridge. He later moved to the Champion district where at the time of his death he was farming three sections of land.

Always apparently in robust health when he was taken ill in November his condition was not regarded as serious for a time but as time went on it was apparent that ultimate recovery was impossible and he passed away on Tuesday, Jan. 21, in his 46th year.

During his residence here he had taken an active part in everything pertaining to the welfare of the town and district and for many years was a councillor for his division. He was also prominent in Masonic, Elk and O.E.S. circles. Two years ago he purchased a residence in Champion where he resided at the time of his death. As one of the most successful farmers in the district and an outstanding citizen in every way his demise in the prime of life is very widely regretted and mourned.

In addition to his wife he leaves a family of seven children, all living at home, Andrew, Sanford, Wayne, James, Walter, Ruth and Gladys. His mother, two brothers and two sisters also survive him. The funeral took place in Calgary, Rev. T. T. Faichney conducting the funeral service at Shaver's funeral parlour, and Perfection Lodge A.F. & A.M. taking charge of the burial. The tributes of flowers represented nearly every family in the community as well as dozens of friends living outside.

His family have the sincere sympathy of the community in their bereavement.

Tributes of flowers were received from the following:

Champion Lodge A.F. & A.M., B.P. O. Elks, Royal Purple, O.E.S., Women's Institute, Ladies' Aid, High School Literary Society, Y.P. Society, Mother, Andrew, Sanford and Wayne; Gladys, Ruth, Jimmy and Walter; Mr. and Mrs. G. M. Campbell, Mr. and Mrs. W. S. Ryan, Dr. and Mrs. Freeze, Mr. and Mrs. A. W. Jopling, H. E. Johnson, L. and S. Jopling, W. H. Bowman and family, Mr. and Mrs. Fred Alcock, Mr. and Mrs. H. Cooper, Mr. and Mrs. Geo. Taylor, J. D. Henderson, Mrs. T. R. Jopling, Mr. and Mrs. Jas. Ellis, Mr. and Mrs. Horace Gill, Mr. and Mrs. C. Rhodes, Otto Miller, Mr. and Mrs. G. F. Smith, George, Rachel, Alex.; Mr. and Mrs. McCollough, Mr. and Mrs. W. McRae, Mr. and Mrs. P. M. Patterson, Mr. and Mrs. W. F. Bosworth, Mr. and Mrs. Wise and family, Mr. and Mrs. L. M. Groves, H. E. Smith, G. Mark, Mrs. C. A. Williamson, Mr. and Mrs. H. C. Jopling, Mr. and Mrs. Duncan and C. Thornton, Mr. and Mrs. B. Tyler, Mr. and Mrs. G. A. Orr, Mr. and Mrs. Geo. Deppa, Mr. and Mrs. H. Higgins and family, Mr. and Mrs. J. M. Moffatt, Mr. and Mrs. F. Racker, Mr. and Mrs. D. Harper, Mr. and Mrs. G. E. Volner, Mr. and Mrs. Frank Smith, Mr. and Mrs. Fred Clover, Mr. and Mrs. Geo. Alcock.

The death of Herbert Willies, which occurred in the Holy Cross hospital, Calgary, on Sunday, January 28th, removes a highly respected citizen and successful farmer from this vicinity.

The deceased was born Oct. 2nd, 1875, at Broad Water Farm, Oseington, Nottinghamshire, England. He came to Canada in 1914 and to Alberta in 1915, locating some six miles northeast of Champion, where he continued to reside until the time of his death. While of a quiet and retiring disposition he was widely known for his strict integrity and kindly deeds. He was one of the suc-

Champion Wins From Carmangay

Champion administered a 2-1 defeat to the Carmangay hockey team on their own ice on Friday, scoring two goals in the first period, and putting on an impregnable defence during the balance of the game in which Harris in goal for Champion is given considerable credit. The teams were as follows:

Champion—Harris; McIntyre and Adams; Stephenson, McCumber and Taylor; subs., Fred Watts. Carmangay—Oatis; Palmer and Moore; Miller, Hicks and Hubbs; subs., Nelson and Mallen.

The hockey team played at Granum on Tuesday night and report one of the best games of the season, although they took the small end of a 3-2 score. Recently the whole team has settled down to real hockey and are showing improvement at every appearance.

On the local rink on Thursday night Vulcan defeated the local team by a score of 7-1. The game was well contested despite the disparity of the score. There was a fair attendance and the game was thoroughly enjoyed by the spectators to judge by the rooting.

The P.T.A. meeting was held at the school Monday afternoon Jan. 27. It was decided to have the last Monday evening of each month as a regular meeting date. A china shower was also decided on, each one to bring a cup and plate next meeting. Mrs. Williamson presided a short program and a lunch ended a very pleasant afternoon.

Card of Thanks

Mrs. Bertha Anderson and family wish to thank all those who so kindly came to their assistance during the illness of Mr. Anderson and later for help with the funeral arrangements, and also to the many friends who sent tributes of flowers. In particular Dr. and Mrs. Freeze, Mr. and Mrs. G. M. Campbell and Mr. and Mrs. W. S. Ryan rendered assistance which will never be forgotten.

Successful farmers of the district, having farmed in England before coming here.

He leaves to mourn his loss two sisters, Miss Willies, living with him on the farm, and Mrs. (Dr.) Gillies of Sydney, New South Wales; also two brothers, one twin brother, Walter, residing on an adjoining farm and an older brother of Mrs. S. B. Hunt. His father accompanied him to this country, predeceasing him in 1918. The funeral took place to the Champion cemetery on Tuesday, and was very largely attended, the profusion of flowers attesting in part the esteem in which the deceased was held. Rev. S. B. Hunt officiated.

Flowers were received from the following:

Miss Mary and Walter Willies, Mr. and Mrs. Trevelyan and family, Mr. and Mrs. John Doyle and family, Dr. and Mrs. Freeze, Mr. and Mrs. Robert Tyler, Mr. and Mrs. Geo. Alcock and family, Mr. and Mrs. Fred Alcock and family, Mr. and Mrs. A. McCollough and family, Mr. and Mrs. J. McDougall and family, Mr. and Mrs. W. McRae, Mr. and Mrs. Frank Sisson, Mr. and Mrs. W. S. Ryan, Mrs. Mattie Galloway, Mr. and Mrs. Geo. Taylor and family, Mr. and Mrs. J. Ellis, Mr. and Mrs. W. Ellis and family, B.P.O.E. lodge, Mr. and Mrs. A. Miller and family, Mr. and Mrs. B. B. Bond and family, Amity Club, Royal Purple.

NOTES AND COMMENT.

Farmers must have a difficult problem in figuring out just where they get off at in the wheat problem. There was what appeared to be a well authenticated statement that there was a world shortage of 500,000,000 bushels of wheat in 1929 and that prices could not fail to advance considerably before the season was over. To date this is not borne out by facts, and the recent slump in wheat prices is decidedly disappointing. Now other authorities are out with the advice that wheat farming should be curtailed as production promises to exceed the demand and prices will go still lower. Texas, Russia and the Argentine are all quoted as increasing wheat production to an extent which cannot fail to affect world markets and result in lower prices. The change to power farming is claimed to have increased wheat production practically everywhere in the old areas and to have reduced its cost. One thing is certain and that is that diversified farming is not practical to any great extent in this vicinity and it is doubtful if any change will be made in this direction in this district.

Rumors of a provincial election in June would seem to indicate that the U.F.A., or that portion of it favorable to a set date for the Dominion election, should hasten to warn Premier Browne against such a course as springing an election before the expiration of the life of the legislature.

The annual financial statement of the Ladies' Aid of the United church would indicate that the women are replacing the men very largely in supporting the church. This is highly creditable to the women, but how does it reflect on the men?

The annual elections of municipal officers is a matter of the near future and it is to be hoped the ratepayers of both village and municipal district will find time to attend the annual meetings and take part in any discussion which may arise. There is little use of complaining about what is done by these bodies if no interest is taken in their selection.

An agricultural short course will be held at the University of Alberta during the period February 3rd to February 15th, 1930. The course might well be called a Farmers and Home-makers course, as it has now provided the opportunity for the rural women as well as the men to obtain in a short time first-hand knowledge of the work going on at the University for the betterment of Alberta Agriculture. This course will be under the direction of the teaching and investigation staff of the Faculty of Agriculture, but will be very generally assisted by members from other Departments of the University.

New Nipawin Bridge Will Provide Gateway To Rich Area In Northern Saskatchewan

Faith in Canada's northern areas of resource becomes reality in the Canadian Pacific bridge now nearing completion at Nipawin, Saskatchewan. Designed to take the heaviest locomotives likely to be built, this magnificent structure, a little more than 1,907 feet long, spans the Saskatchewan River, at a point leading from the more definitely agricultural section into timber and mining districts of recognized magnitude. It will afford ready access to at least a hundred farm lands and direct transportation possibilities for those who wish to explore and develop mineral expanses rich in promise. The end of the year saw, it finished.

Among the major operations of the Canadian Pacific for the year 1929, the Nipawin Bridge, begun in October, 1928, is one of the exceptionally large steel structures in the west. In symmetrical spans it connects north and south banks of the Saskatchewan at about 150 feet above water level of the river. It provides not only railroad transit calculated for 60,000 pounds axle load on the engine drivers, but is made in double-deck fashion with a steel foot highway for vehicular traffic on the lower chord, designed for fifteen ton loads.

This steel roadway, built on a concrete understructure with two inch untreated wearing surface, will carry the Saskatchewan Government's provincial highway across the river. Legislative force co-operated with the railway company in relieving a situation which naturally proved a hindrance to agricultural development. Hitherto a ferry was required to convey travelers and vehicles across, a mode of travel of difficulty by reason of the steep descent to the water level on both banks, a particularly serious concern in winter. At each end there is a trestle approach connecting the bridge roadway with the usual highway to the river. What this connecting link will mean in agriculture settlement and progress can scarcely be computed.

T. C. Macneish, Engineer of Construction, describes this latest of Canadian Pacific bridge achievements in the west as deck riveted truss design with spans 263 feet long. The deck plate girders at the north approach are supported on steel trestle carried on low concrete piers. The abutments are of concrete and the four centre spans consist of deck trusses carried on reinforced concrete piers. The three centre piers are 130 feet high from the bottom of the footings and those connecting the outer spans are 120 feet.

Engineering skill of a high order has come into play in the construction of the Nipawin bridge. Mr. Macneish explains that owing to the depth of the water in the turbulent and shifting Saskatchewan channel, vertical supports from the river bed were impracticable. The great 260 foot spans were built out by derrick cranes from each pier and were added to till the steel stretched horizontally and reached the supporting span at the end of the truss. More than 200,000 rivets have been driven by air hammers in the field to take care of the eight and a half million pounds of structural steel required in the making.

The bridge has been built by assistant engineer H. D. Brydon-Jack, whose wife, an artist of ability, has painted it with its romantic environs so skillfully that she has produced an art subject of such beauty which is now on display in the Royal Art Gallery at Montreal.

Up where the Saskatchewan water begins to slough their color and take on the blue of mountain streams, this fine structure becomes part of a landscape typical of the vigorous North-West.

When the project was first mooted, D. C. Coleman, vice-president of the Company's Western Lines, referred to this railroad-structure as one of the finest structures of its kind—a main

gateway to the North, and tangible evidence of the Canadian Pacific Railway Company's faith in the mineral and agricultural resources of Canada's great mid-north area.

Treated Cello With X-Ray

Destroyed Beech In Wood and Greatly Improved Tone

A musician who played the cello was worried about his beautiful instrument, which was infected with wood beetles and was gradually losing its tone. Having heard of wonderful cures with X-rays, he took the cello to a London hospital and asked whether anything could be done. The doctors were rather simple at the idea, but it suddenly occurred to one of them that a powerful dose of X-rays might kill the beetles. So the cello was put on the X-ray couch and was given a strong dose of the rays.

The novel treatment had the desired effect, for not only was the beetle killed, but the tone of the instrument was much improved. This happened about a year ago and the delighted cellist went to the hospital the other day to tell the doctor of the lasting benefit of the treatment.

Winnipeg Newspaper Union

(By Anneliese Worthington)

An opportunity to have a Paris dress at the cost of a few yards of material is within your reach. Style No. 2672 is exquisite printed transparent velvet, most flattering shade for transparent blouse or tunic.

The vest of egg-shell falls silk crepe presents a striking contrast, and interesting lingerie touch. Chic femininity is noted in shoulder and high to elbow of plain velvet.

The wrapped treatment of skirt provides lovely contrasting movement across front. The cascading effect of gathered flounce at left side of skirt provides lovely contrasting movement across front.

The surplice closing bodice makes it suitable for woman of larger figure. The slightly ruffled waistline is decidedly smart and youthful.

It is designed in sizes 16, 18 years, 20, 22, 24 and 26 inches bust. Midnight blue crepe de chine is very fashionable for office or classroom. The boxes may be made of self fabric or of matching sheer velvet.

Brick red canton crepe, tobacco brown silk crepe, Lucerne blue sheer velvet, and feather-weight woolen in coppery tones very chic. Pattern price 25 cents.

SUPERINTENDENT OF COLONIZATION

Indigent Patient Problem

Question Is Discussed By Saskatchewan Medical Council

Efforts to solve what is known as the indigent patient problem have been commenced by medical men of Saskatchewan. While views of the physicians have not been given, the matter was discussed at the annual meeting of the Saskatchewan medical council.

The medical council spent much time on the problem of the relation of the medical man to the public, particularly in regard to indigent patients.

"No scheme has been decided on," Dr. O. E. Rothwell, newly elected president, states. "A conference has been called for interested organizations in the province and we hope to reach a solution."

The meeting will be held in Regina some time later this month. The United Farmers, municipal officers, medical men and other interested parties will take part in the conference. The exact date has not been decided on.

Dr. Rothwell said that the matter was one of much interest to the medical council in the province and elsewhere in Canada. It is expected that it will provide one of the important discussions at the gathering of the British Medical Association which will be held at Winnipeg during August.

It is expected that a number of Saskatchewan physicians will attend the Winnipeg gathering. The association has met on one or two previous occasions in Canada.

The Will Discourage Immigration

No Change Is Made In Status Of Immigrants From Europe

No change has been made in the quota of colonists to be brought from central European countries in 1930, according to officials of the Department of Immigration and Colonization of the Canadian Pacific Railway at Montreal. The reply was given to the question of the number of Mennonite families coming to Canada this year. A conference between the railway officials and the Department of Immigration, of the Dominion Government, met last week to discuss a few sensitive families last September, and since that time no changes have been made.

Teacher—"Why are onions good for us?"

Pupil—"Onions keep us well, because when we eat them no one else comes near enough to give us any germs."

"How did your father know we went out in the car yesterday?"

"Quite simple! You know that stout gentleman who ran over? That was father."

Canada Occupies Foremost Place Among Countries of the World In Systematic Seed Improvement

A Challenge To The West

Western Canada Must Show Superiority Of Our Grain At World's Grain Show

"Mr. Craig, Deputy Minister of Agriculture, points out that the world's grain fair which is to be held in Regina two years hence as a grain-growing country on trial as a grain-producing country. The prairie provinces have so persistently invaded Chicago and carried off honors at the International, that they have invited friendly reprisals. Every grain-growing state in the Union, and probably every outstanding grain-producing country in the world, will have exhibits at its Regina. Canada's rivals are thus being offered an opportunity to carry the war into Africa," and they have very substantial inducements to do so. If Western Canada can capture the awards at Regina that will be a more convincing demonstration of the superiority of our grain than the honors which have been brought back from Chicago. If our grain is to carry away these prizes, the prestige of the grain-growing provinces will suffer in corresponding degree. The grain to be shown at Regina will have to be grown during the next two seasons. It is not too early to create attention upon that event and begin to prepare for it—Edmonton Bulletin.

For Study Of Cancer

Colony Of Mice To Be Kept For Experimental Purposes At Laboratory In Maine

A city of mice—20,000 of them—will ultimately be under the eyes of scientists at the Jackson Memorial Laboratory, at Bar Harbor, Me., for the study of cancer. Clarence C. Little, director of the laboratory, and former president of the University of Maine, and the University of Michigan, has announced.

A complete record of the life history of each of the small rodents will be kept and although no startling or sensational results are expected, Mr. Little and members of the staff hope to learn something that will aid in the fight against the disease.

It is again predicted that paper suits for men will be added to the paper plates, paper towels, and other cheap and easily replaceable paper articles in general use.

A sheep's age can be told by its teeth.

Only Six Million Pounds May Be Taken In Lake Winnipeg, According To Baling

The limitation on the catch of fish in Lake Winnipeg, has been set at 6,000,000 pounds for this season, according to an announcement by W. A. Found, Deputy Minister of Fisheries, at Ottawa. The limit on which is in the discretion of the minister of the department, was originally set at 5,000,000 pounds. Mr. Found said that in succeeding seasons the figure would revert to 5,000,000 pounds.

Gift (to returning husband at restaurant—"Oh, darling, I told you've come! We heard that some idiot had fallen over the cliff and I felt sure it was you!"

Book Agent (to farmer): "You ought to buy an encyclopedia, now that your boy is going to school."

Farmer: "Not on your life. Let him walk, the same as I did!"

'Fresh from the gardens'

Forward, Canada!

Lying latent in the nature of almost every individual there is one human characteristic which comes to full bloom in times of excitement, emergency, or undue stress. It is the tendency to indulge in exaggeration. A crowd assembles for some particular reason and the average person estimates the number at two or three times its actual size, or an accident occurs and the report is immediately circulated that the toll of the dead and injured is many times greater than the reality.

So, too, when times are good the impression becomes general that they are better than is really the case, and a "boom" is created, speculation is indulged in far beyond what the circumstances warrant, and the end is ultimate loss, and in some cases disaster. Here in the West indications in any year may point to a fairly large and satisfactory crop yield, and the inevitable tendency is to make estimates of the yield far in excess of what the harvest reveals.

Turning to the other side of the picture, and the same thing will be found to be true. A slump occurs in business, the crop season is over below the average, a degree of unemployment exists, and almost immediately the human tendency to exaggerate comes into play, and everything is painted in much more somber colors than there is any justification for so doing.

This tendency to undue exaggeration is in evidence in Western Canada today to the detriment of the whole country, and to every person resident therein. Recognizing that the crop of 1929 was disappointing and below the average of many years, coupled with the further fact that the burden of the loss has to be borne by certain sections of the country which harvested little or no grain, the impression is created of a practically total crop failure, and that the country is in no good. Such exaggeration ignores the splendid returns of former years, and takes no cognizance of the fact that, taken on the whole, and year after year, Western Canada has been forging steadily ahead. One swallow does not make a summer, nor does one crop shortage, or even failure, condemn a country or provide substantial ground for discouragement and depression, any more than one bumper crop establishes the fertility of any section or justifies a "boom" and extravagant expenditure.

At this time the people of Western Canada, in city and country alike, may well give consideration to, and base their actions upon, the average of conditions. If the grain crop was smaller than usual in 1929, it was so big that it shattered all records; if the 1929 grain crop fell below the average, dairy production, for example, for 1929, increased by three and one half million pounds.

The future of building subdivisions in the West, last year, established new high records; employment was maintained at a high ratio throughout the first nine or ten months of the year, and the present slump is only seasonal and temporary, with prospects for 1930 just as bright as they were in 1929.

Let us remember that if the export of agricultural products by Canada fell off in the last half of 1929, the grain is still in Canada to be transported by our railways and sold by our people, and the results will be reflected in the business activity of 1930. Let us be encouraged by the fact that the greatest of our great Western enterprises, the Wheat Pool, has successfully contended with a set of the most difficult circumstances. It has been put to the test, but with the united support of all Canada's banking institutions and business and commercial interests generally, it is now quite evident that it is winning out in its great fight to protect the interests of Canada's great army of producers.

It is impossible to see the world for any person, company, or corporation, to forever move forward, onward and upward. It is inevitable that periods of recession must interrupt such steady progress. The stock market cannot forever go on climbing higher and higher; it must take a drop some time. If the pendulum swings too far one way, it must swing back again, because an equilibrium must be maintained. We cannot always live on the rarified heights; it becomes necessary at times to descend into the quiet and repose of the valleys.

The position of Canada, and of all Canadian industry, agricultural, manufacturing, commercial, is essentially sound and strong; stronger than that of almost any other country in the world. There is no justification for any depression, because no cause exists for it. To the extent that it is prevalent with some people it is largely a mental condition. Reverses have been suffered by some people in Canada as in other lands, and occasions arise in the life of every one when they meet with a reverse, but a reverse is not defeat. Courageously faced it can be turned to victory.

Putting Radio To Test

Soviet Radio Station Convinces With Byrd's South Polar Party

Over 12,420 miles of sea and land—the northernmost and southernmost outpost of civilization—covered recently by radio.

The Soviet radio station in Franz Joseph Land, compared with the radio station in the Antarctic, has been heard by Admiral Richard E. Byrd's south polar party.

The Soviets described an Arctic dawn, and the Americans replied with a description of an Antarctic nightfall.

Byrd asked the Russians concerning progress of the search for Capt. Carl Denison, American aviator-explorer, lost in the Alaskan Arctic since Nov. 9.

A fly no bigger than a bee has been recorded to fly 515 miles per hour.

Heavy Charge On Industry

Fires Are Costing Canada Almost One Hundred Million Annually

Fire cost Canada approximately \$100,000,000 yearly, according to a statement issued by the Canadian Chamber of Commerce in an effort to introduce to chambers and boards throughout the country a composition designed to lower this heavy charge on industry.

Business bodies have been classified into five sections determined by population, and a shield will be awarded by the chamber in each section for the organization showing the greatest reduction in fire loss, the most educational activity along fire prevention lines, and the most permanent structural and protective improvements.

Origin Of Old Superstition According to a story in the London "Sunday Times," the superstition that it is unlucky to open an umbrella in the house has its origin in Catholic times, when the priest carried the victim to the dying under a small canopy in the form of an umbrella, as it still does in Catholic countries today. Therefore the open umbrella in the house became associated with the idea of a death.

Check Filling Mail With Minors.

Vacuum-Cleaners Are Valuable In Mining

Big Aid In Removing Coal Dust and Collecting It For Fuel

Can you imagine a vacuum-cleaner being any use in a coal-mine? Housewives may scoff at the idea, but mining experts don't. They have discovered that vacuum-cleaners are a big aid in removing the coal-dust which settles everywhere in a mine, and collecting it for use as fuel. Coal-dust is frequently the cause of very serious accidents in mines, and it has been proved that even in quantities as small as one-fifth of an ounce to each cubic foot of space, it may produce an explosion. And the effects of an explosion of this kind are far-reaching—they are often at their worst 500 to 800 feet from the place where the trouble started. Various methods have been tried to prevent coal-dust explosions, one of the most widely used being spreading stone dust and sand on the floors of workings.

THIN-BLOODED PEOPLE ALWAYS FEEL COLD

To Withstand The Rigors Of Winter The Blood Must Be Rich And Pure

Thin-blooded people are easily discouraged. They lack strength; grip, influenza and ordinary winter colds take them by surprise and are exceedingly hard to shake off any of these ailments. They feel cold, and as a result their nervous system becomes a wreck; they cannot sleep and life becomes a burden.

To overcome this deplorable state of health good blood is essential. This good blood gives warmth to the body; it keeps the system in good condition, to either prevent colds and grip or to banish their dread effects. Dr. Williams' Pink Pills is the perfect blood-builder—they never fail to make new, rich, red blood. They are the ideal tonic for winter use. Concerning their use Miss Kay L. Grant, Meritt, Ont., writes:—"I was very much run down but found health and strength through the use of Dr. Williams' Pink Pills. After other medicines had failed to help me, two years ago I felt tired all the time; had no appetite; was nervous and out of the tone. Nothing I took seemed to do me any good till I began the use of Dr. Williams' Pink Pills. After a short treatment with them the dragginess feeling left me; my appetite improved, my blood became warmer and my strength gradually increased. This encouraged me to continue the use of the pills and now I am feeling better than I have done for years."

Dr. Williams' Pink Pills do one thing but they really do it well. They build up and renew rich, red healthy blood making weak, run-down men and women strong, active and happy. They are sold by all medicinal dealers or by mail at Dr. Williams' Medicine Co., Brockton, O.

California Lamps Eat Raisins

At the University of California there have been held some lamb fasting tests carried out with raisins and other foods. They show that lambs readily absorb the material weight of their raisins or grain plus of other diet, and that the feed is very nearly as fattening as whole barley and lucerne hay mixed.

Persian Lamb—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Softly absorbed by the tissues. Delicately fragrant. Imparts a velvety brightness to the complexion. Tones up the skin, soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Lamb is indispensable to women of refinement.

Years ago good sleighing for Christmas week meant good business for the merchants. Nowadays it is all luck.

Optimist: "Cheer up, old man. Things aren't as bad as they seem to be."

Pessimist: "No, but they seem to be."

Smoothie Spells Couldn't Walk Far Gassed For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk even a short distance, on account of having to gasp for breath."

A friend told me to try MILBURN'S NERVE PILLS.

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c, a box at all druggists and health food stores. Mailed direct to receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Air Must Be Charted

Pilots Should Know Exact Location Of High Mountain Peaks

Tragic was the fate of the two British airmen who crashed into the side of a mountain in Northern Africa, and were killed, while attempting to make a non-stop flight from England to Cape Town. It is a reminder that mountains are a greater danger to airmen than rocks are to seamen.

That there have been so travelled that almost every rock in existence is known, charted, and in some way marked by signs at night. Except for what cartographers may do by changing the configuration of the bed of the ocean, there is probably no voyage left in the same way. This is not the first time that aviators have come to grief through hitting a mountain.

The route to South Africa is across varied terrain. These airmen may have been flying thousands of feet high and felt they were quite safe, forgetful of the peaks which rear their heads far into the clouds.

These peaks, however, planes are to increase rapidly, and the pilots will have to be provided with charts which will show them how high they must fly along the routes in order to avoid hitting a mountain.

Record Of Flying Clubs

Canada's Airmen Had 15,400 Flying Hours Last Year

Members of Canada's 23 light aeroplane clubs flew 15,400 hours during 1929, figures released by the civil aviation branch of the Department of the Interior. The flying time is equivalent to 1,282,000 miles, and is nearly twice that flown in 1928. Total membership of the clubs is 5,000. At the end of the year there were 306 solo fliers, while 165 private pilots and 88 commercial pilots had graduated from the student ranks of the clubs.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines, the worm powder will be found an effective remedy. They attack the child, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These worms mean health and improvement.

Recipes For This Week

(By Betty Barclay)

SALMON CHARTREUSE

- 2 tablespoons gelatine.
- ½ cup cold water.
- 1 tablespoon chopped carrot.
- 1 tablespoon chopped onion.
- 1 bay leaf.
- 2 tablespoons chopped celery.
- 2 cups water.
- Juice 1 lemon.
- ½ teaspoon salt.
- Few grains cayenne.
- Boiled or canned salmon.
- Lettuce: lemon slices.
- Mayonnaise.

Soften gelatine in ½ cup cold water. Bring carrot, onion, bay leaf and celery to the boiling point in 2 cups water and boil 4 minutes. Add softened gelatine, strain, add lemon juice, salt and cayenne. Put a layer of jelly in bottom of a mold that has been dipped in cold water. When firm cover with salmon and pour over remaining portion of gelatine mixture. When stiffened unmold on bed of lettuce, garnish with lemon slices and serve with mayonnaise.

APRICOT WHIP DESSERT

- 1 package lemon junket.
- 1 pint milk.
- ½ cup stewed apricots.
- 4 teaspoons sugar.
- 2 egg whites.

Make junket according to directions on package. Heat the egg whites until stiff, add the apricots, which have been put through a sieve and mix thoroughly. Pile on top of junket when ready to serve.

The area of the world which boasts the least illiteracy is western Europe.

Use Ancient Method To Heat Cathedral

System Used In Roman Baths Duplicated In Great Liverpool Edifice

A system of heating similar to that used by the Romans in their magnificent bath houses has been adopted for use in Liverpool cathedral, which, when completed will be one of the largest and most magnificent in the world, remarks Mr. Barry Watson, B.A., Sc., C.B.E., M.E., writing on "Heating the House," in the latest issue of Canadian Homes and Gardens.

"One of the earliest means used for the distribution of heat to points remote from its source, was that invented by the ancient Romans for many of their bath houses," he says: "This was the distribution of hot gases from the fire through underfloor ducts in the building, and it is a significant fact that this same system has just been installed in Liverpool cathedral with the difference that the air heated by stoneware coils, instead of smoke and hot gases from the fire, passes beneath the stone flooring. In this a system of the air of the building is heated by contact with the warm flooring, and upon expanding, due to heat it becomes lighter than the cooler air above, and therefore, floats gently toward the top of the building, while the heavier cold air falls to the floor, to be heated in its turn."

"This movement of the air is a simple example of gravity circulation. The smelter, which is principal upon which nearly all residential heating systems operate."

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a firm hold, fastens its grip on the bronchial passage tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily beneficial cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Award For B.C. Astronomer Gold Medal Won By Director Of Dominion Observatory, At Victoria

The gold medal of the Royal Astronomical Society has been awarded to Dr. J. R. Plaskett, director of the Dominion Astro-Physical Observatory, at Victoria, B.C., it has been announced. Dr. Plaskett earned this high award for valuable observations of stellar radial velocities and important conclusions derived from these observations. The Victoria scientist has accepted the Society's invitation to hold the post of George Darwin, Lecturer for 1930, in England.

The formation of large halos begins at heights estimated at between 15,000 and 40,000 feet above the ground.

The river systems of the earth are estimated to carry to the ocean each year about 6,500 cubic miles of water.

The lowest point for thousands of miles of the Andes is 10,000 feet above the sea.

Your Child's Cough Cures This Cold Treatment

CHILDREN have to be "dosed." When rubbed on, Vicks VapoRub cures colds 2 ways at once without "dosing": (1) Its healing vapors, released by the body heat, are inhaled direct to the air passages; (2) "It draws out" the soreness like an old-fashioned poultice.

2 ways at once VICKS VAPORUB OVER 10 MILLION JARS USED YEARLY

Enter Claim Against British Columbia Smelting Company For Alleged Damage To Crops

A meeting of the International Joint Commission is to be held at Washington, D.C., when the case of the claims entered by the farmers of the state of Washington against the Consolidated Mining and Smelting Co. of Trail, B.C., will be heard.

These farmers claim that the sulphur dioxide fumes from the smelter have done great damage to their crops, have destroyed the food of the soil and, as a consequence, have caused financial loss to them. The case was heard in the state of Washington last year, when a thorough investigation was conducted on the spot by the international joint commission.

The smelters have since proceeded to construct a plant which, by the Cottrell process, will extract the injurious elements from the fumes and which will turn them into fertilizer. The success of this effort, which will cost several million dollars, depends upon the market offering for such fertilizer in the prairie provinces.

Evidence taken before the commission last year showed that while some damage had been done by the fumes, this was scarcely so considerable as claimed. Smelters had been cognizant of the matter for several years and in their own immediate neighborhood in British Columbia, had settled it by purchasing the surrounding land to a wide radius. This method of adjustment is impossible in the United States, however, since the state of Washington has a strict law which prohibits aliens from owning property in that state.

Maria: Is it true that Margaret has a secret sorrow?

Anna: Why, yes; hasn't she told you of it?

Mahogany trees do not reach their full height until they they are 200 years old.

Aspirin

Needless Pain!

People are often too patient with pain. Suffering when there is no need to suffer. Suffering when they find the relief so easily at hand.

Working though they ache all over, Asprin would bring them immediate relief.

The best time to take Asprin is the moment you first feel the pain. Why postpone relief until the pain has reached its height? Why hesitate to take anything so harmless?

Read the printed directions for checking colds, easing a sore throat; relieving headaches and the pains of influenza, neuritis, rheumatism, etc.

You can always count on its quick relief. If pain persists, call for a physician. You need not see a doctor as to its cause.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one tasteless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably be in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

WORLD HAPPENINGS BRIEFLY TOLD

The protocol adopting the Young plan was signed at the second Hague Reparation conference.

A total of 12,430 office operations in Canada last year provided the basis for a report just issued by the post office department. This is a decrease of 48 accounted for by the establishment of rural free delivery.

A reduction in the war office estimates by a million and a half sterling in the next budget, is foreseen in the London Daily Herald, as a consequence of the government's drastic revision of expenditures.

A search is now being conducted for an old post of the Hudson's Bay Company, and the fort of the Northwest Company which once stood close to the Saskatchewan River, about 80 miles north of Saskatoon.

Hon. P. J. Cahill, Minister of Finance in the Newfoundland Government, told the Canadian Press the Newfoundland would balance its budget this year for the first time in a decade.

Owing to the increase in the number of cheques drawn by persons who have not sufficient funds on deposit to meet them, the Bank of Ottawa has decided to make a charge of 50 cents for every cheque issued hereafter.

Commissioner George Mitchell, international secretary for the Salvation Army's work in Europe, and in the British Dominions, died recently in London. He began his career with the Army as a messenger boy more than 40 years ago.

Execution of the late Gen. Bramwell Booth, former Salvation Army head, have been ordered by the chancery court to turn over to General Higgins, who now heads the Salvation Army, property valued at \$1,000,000 (\$5,000,000).

The beacon light of Brandon Aero club has been put into operation. It is one of the first in Western Canada, and it will be used to guide night pilots, not only on the regular mail routes, but other airlines as well. Its flashing rays can be seen for miles.

Pay Big Dividends

About Two Hundred and Fifty Millions Paid to Stock Holders in Canadian Corporations

Approximately \$250,000,000 was paid in dividends to stock holders in Canadian corporations in 1929, according to an estimate based on actual disbursements of more than 500 securities listed on the Canadian stock exchanges and others widely held by the general public.

During the year a number of bonuses or extra cash dividends were also paid. In the final three months of last year about \$10,000,000 was added to regular quarterly dividends.

British Columbia Salmon

Salmon canned in British Columbia is exported to over thirty countries in the world. The annual marketed value of the B.C. product is more than \$13,000,000.

The American gallon is less than the English by one-seventh.

Smoker (whose cigar won't draw): "Now they have invented a smokeless cigar." —Tokio Pakku, Tokio.

Sunlight and Health

Ultra-Violet Rays are Necessary To Life and Health

Have you ever noticed your lawn where a board or flower-pot has lain for a few days. The grass will be yellow and will eventually turn dead. It is the lack of sunlight and the ultra-violet rays which are necessary to the health and life of plants as well as human beings, animals and birds.

Polytymen have discovered that the ultra-violet rays of the sun prevent leg weakness and other diseases, and promote growth in a marvelous way. Unfortunately ordinary glass does not allow these vital rays to pass through it with the red and other rays which we know as sunlight. However there is a glass substitute called "Windolite" which is flexible and yet unbreakable and that allows full penetration of these important ultra-violet rays. Up until a few years ago, turkeys were difficult to raise in confinement, but with the brooder houses fitted with "Windolite" they thrive as well as in natural sunlight and get a splendid start in life before they are allowed outside, especially when the weather is cold and wet.

"Windolite" is now being used extensively all over Canada for poultry houses and dairy barns as well as in schools, and in hospitals, and sanitariums where sun baths are a regular part of the treatment of certain diseases.

What Year Is This?

May Be Even Later Than We Are Dating It

Although the past year is recorded as 1929, it may really be, says an article in 7-11-31, 1033, or even later. This fact is indicated by a record of the eclipse of the moon which history says that Christ was born during the reign of Herod the Great. But Herod died in the spring of 4 B.C., the date being fixed by a lunar eclipse which took place the night before his death. Obviously, therefore, Jesus was not born until after the year 4 B.C., and possibly earlier. The Church had no definite knowledge of the date of Christ's birth. It fixed the year, month, and day of the month arbitrarily. Astronomers are able to calculate the dates of past eclipses as accurately as those of the future, and so have determined the very day and hour of the eclipse that ushered Herod the Great out of this life.

Farm Production In B.C.

Coast Province Establishes a New High Record in 1929

Value of farm production in the province of British Columbia totalled \$61,000,000 in 1929, a new record. The increase over 1928 was \$5,000,000. Increases were distributed over every branch of agriculture and horticulture. The fruit and vegetable centre of which is in the Okanagan Valley, had an output valued at \$8,250,000. Dairying showed an advance of \$1,250,000. Returns from poultry were more than \$600,000, an increase of nearly 200,000 over the previous year.

The circular flaring skirt gives delightful swing when in motion. Style No. 3029 is made in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust.

For classroom, it is especially smart in army blue wool crepe with collar and cuffs of white crepe de chine and worn with vivid red suede belt and black crepe satin, with collar and cuffs in eggshell shade, plus shade in full silk crepe self-trimmed with the matching shade dotted in eggshell. Hunter's green sheer velvet with collar, cuffs and tie of matching canvas. The circular flaring skirt gives delightful swing when in motion.

SUNDAY SCHOOL LESSON

FEBRUARY 2

PUTTING GOD'S KINGDOM FIRST

Golden Text: "Seek ye first His kingdom, and His righteousness; and all these things shall be added unto you."—Matthew 6:33.

Lesson: Matthew 6:1-34.

Devotional Reading: Psalm 145:1, 2, 7-13.

Explanations and Comments

Genuine Charity, verses 1-4.—"Ye therefore must be perfect, even as your heavenly Father is perfect" are the closing words of Chapter V, of Matthew, our lesson for last week. The citizens of the new kingdom must excel the Scribes and Pharisees in righteousness. Matthew next records Jesus' words about almsgiving, prayer, and fasting—three forms of good works which the Pharisees boasted. Jesus emphasized the fact that righteousness is a transaction between man and his Heavenly Father, and into it no thought of what others say or think should enter. Almsgiving, prayer, and self-sacrifice were not given in order to receive the praise of men.

Genuine Prayer, verses 5-8.—The Jews had certain times for prayer, and where a man was when he prayed or how he prayed, they were very particular. Jesus called them, who stood planned to be found at prayer time in conspicuous places in synagogues or at street corners. It was the appearance of piety that interested them, not the righteousness itself. Jesus and self-sacrifice were not given in order to receive the praise of men.

Verily I say unto you, They have received their reward. The Great commandment "received in full," and is the one used in drawing up receipts. They have received the full reward of their piety, they thought, they have been seen of men, they have no claim whatsoever to any further reward.

You can best talk to your Father in Heaven when you are by yourself. When you pray, counselled Jesus, shut out the world and all your fellow men with God—enter into this inner chamber, your secret place where you can be alone with God, and having shut the door, pray to your Father who is in secret. For Nathaniel's place for prayer was under the fig tree. For Peter it was the mountain, and for Jesus himself the mountain, and the garden. His closet, the places where He could have privacy to commune with God. Jesus was not interested in the prayer which He elsewhere commends. He is interested in the sincerity which private prayer affords. And that sincerity which He sees in secret, shall recompense them.

Conference In March

Livestock Men Of Canada Will Meet At Ottawa

A conference of livestock interests to devise ways and means of increasing production will be held in Ottawa, probably early in March. Hon. W. R. Motherwell, Minister of Agriculture, had plans for calling such a conference earlier, but was stricken with pneumonia, but it is expected he will cut the world and all your fellow men with God—enter into this inner chamber, your secret place where you can be alone with God, and having shut the door, pray to your Father who is in secret. For Nathaniel's place for prayer was under the fig tree. For Peter it was the mountain, and for Jesus himself the mountain, and the garden. His closet, the places where He could have privacy to commune with God. Jesus was not interested in the prayer which He elsewhere commends. He is interested in the sincerity which private prayer affords. And that sincerity which He sees in secret, shall recompense them.

Dentist: "Which tooth do you want extracted?"

Pulman Porter: "Lower seven."

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light as air, does not crack or break, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are less liable to disease and disease will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Royal Bank Annual Meeting: Assets Exceed Billion Dollars

The annual meeting of shareholders of The Royal Bank of Canada, which closed the business of the most successful year on record, but only marked the beginning of the year which would ensure stable prosperity.

Mr. C. E. Neill, vice-president and managing director, submitted to the meeting a very interesting proposal to which Canada might benefit to a far greater extent from the tremendous profits that are coming annually into the country from the United States.

"Canada," said Mr. Neill, "is attracting approximately fifteen million visitors a year. This great annual migration presents an unparalleled opportunity for increasing our trade. As yet there has been no concerted effort to build the trade which there are purchases which can be made in Canada more advantageously than in the United States. If we could make purchasing in Canada sufficiently attractive, it would make a difference of more than one billion dollars a year in the country's income."

Mr. Neill, vice-president and managing director, submitted to the meeting a very interesting proposal to which Canada might benefit to a far greater extent from the tremendous profits that are coming annually into the country from the United States.

No. 49

Published in the interests of the People of Champion and Farmers of the vicinity.
CEO. L. DEPUÉ, Editor.

Use Cold Water

When you wash your cream separator don't use scalding water, for the first wash. Hot water will coagulate the milk and make it cling all the harder. Have your first water only lukewarm. You will find it much better.

Our heartfelt sympathy goes out to the Willies family in their bereavement.

Congratulations Mrs. Taylor. We would advise a new cap for Geo.

If the bravest are the tenderest, the steer that supplied the most for our dinner last Sunday was a coward.

Going the Pace She.—"Where is your chivalry?"

"He—I turned it in for a NASH."

"Good Equipment Makes a Good Farmer Better."

We unloaded a carload of Mc-Dr. 2236 H.P. on Wednesday.

I never thought separating could be such an easy job," said Mrs. Oscar Hagg after the installation of a new Mc-Dr. Cream Separator.

If the chickens are showing signs of bowel trouble, just put a few drops of carboic acid in their drinking water. Of course this is a deadly poison and must be used with care. Put only enough in their water to give that water a faint odor.

This will cure your chicks, nine times out of ten. If you want 100% put in a pint.

Head as the Movie She.—"Someone is fooling with my knee." He—"It's Me and I'm not fooling."

Win. Penn Motor Oils "Still the Best."

If you should smother on her breath

You can raise your five-to-one that the honeycomb is over.

Old Lady—"Why do you always wear silk stockings?" Flapper—"Because you can't pull wool over mm's eyes."

You know folks we have realized that for a long time, and have profited by it and have built our business solely on service lines for that reason.

Now folks about this tractor school of ours on next Wednesday. We want you to feel that this is your day and that you are all welcome and that we are doing all we can to make it an interesting and beneficial day for you. Kindly help us by putting in your appearance at 9.30 a.m.

Deep Furrow Drills

At last, a Drill that will help combat trying seasons!
A Superior Deep Furrow Drill

is especially designed for this work.

Seed is sown to the bottom of a 4 inch trench made deep by the 10 inch heavy disc furrow opener, down where the moisture insures quicker germination, and protected from high winds by the furrowed condition of the field.

Superior Deep Furrow Drills

are equipped with the same standard internal force features, found on all Superior Drills, high quality workmanship and material, positive Alemite Lubrication Equipment.

Better yields have been accomplished by users of this DRILL in other territories.

SCHOOL OF INSTRUCTION

ON
"CATERPILLAR" Tractors

AND
"CATERPILLAR" Combine Harvesters
 (THE NEW NAME FOR THE FAMOUS HOLT)

Feb. 17-18-19

Lectures by Factory Representatives on the Construction, Operation and Maintenance of these money-saving machines. Those interested in Better, Quicker and Cheaper Power are invited to attend. Moving pictures and slides also tell the story.

UNION TRACTOR & HARVESTER CO. LTD.

9th AVE. at 8th ST. W.

CALGARY

Installation takes place on Tuesday, February 4th, followed by banquet and dance. John Vassilevsk, D.D.G.E.R., District No. 1, of Lethbridge will act as installing officer. There are also quite a number of Lethbridge Elks and their ladies attending.

At the same time, we are afraid that the Southern Alberta wheat growers on their large farms are beginning to lose sight of the fact that they cannot afford not to do some diversifying. The winter feeding of some steers or lambs on fodder crops which can be grown on land that otherwise would be summerfallowed; the production of at least enough butter and cream, eggs, poultry and meat for the farm, together with a good garden; these together with some pasture for livestock such as can be provided by sweet clover, alfalfa and brome grass, will give the wheat farmer some insurance against those dry years that come around in their own sweet way. This diversification still leaves wheat growing the big end of the business by far, and mechanization can be carried on just so long as it will cut down the cost of production per bushel.—Lethbridge Herald.

Local and General

Mrs. A. McCulloch was a dinner hostess on Thursday Jan. 23.

Born—On Tuesday, Jan. 28th, to Mr. and Mrs. George Taylor, twin daughters.

Found—Light grey water-proof coat. Owner apply at Chronicle office.

Mr. and Mrs. W. J. Sanderson and Mrs. D. W. Scott spent last week in Calgary.

Mrs. Harold Matlock is reported improving steadily in the Holy Cross hospital, Calgary.

The Georgian Singers were much appreciated at their appearance here on Saturday night.

Mrs. A. Stevenson and daughter of Blackfalds are visiting her parents Mr. and Mrs. G. A. Manhard.

Mr. and Mrs. Millin received news of the death of a niece at White Lake and left for that point to attend the funeral.

Dennis Ashmore and Mrs. J. Hunniger were taken to the Holy Cross hospital during the week, both suffering from appendicitis.

The Ladies' Aid is co-operating with the Church Board next Wednesday evening in the community hall, at the annual congregational meeting by giving a banquet. Everybody welcome.

The Ladies of the Royal Purple will hold a Valentine dance in the Community Hall on Friday evening, Feb. 14th. The program will include the Lucky Heart waltz, breezy fox trots and snappy one-steps. A five piece orchestra will supply the music.

Friends of Clayton Crane of Calgary, will be pleased to learn that he has recovered sufficiently from his serious illness to return to his studies at the University in Edmonton.

R. C. Crane & Son have recently purchased a new model L. Case tractor and a 10 ft. grand extra wheatsland plow, to help farm the land they bought last fall through L. J. Adams, of O. Arnegard.

The Church Board invite all who take part in the several departments of the church work, from town and country points to attend the banquet and annual meeting in the Community hall on Wed. Feb. 6, at 6 p.m.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 238-8th Ave West, Calgary will make his monthly visit to Champion Friday, February 28, at the Drug Store.

Scotch Concert

Highly Successful

The Scotch concert on Wednesday evening, Jan. 29, was a decided success in every way. Despite the postponement the attendance was good and all were satisfied with the programme presented. Naturally the sketch, "The Pie in the Oven," was the big item on the program and it was thoroughly enjoyed. The cast of characters was as follows:

Mr. McNab A. M. Watt
 Mrs. McNab Mrs. C. Williamson
 Flora McNab K. R. McLean
 Peter Duff F. M. Waite

While real histrionic ability was shown by all the characters Mr. Watt as McNab was at his very best and Mrs. Williamson was fully as Scotch as Mr. McNab could have been. The support was also excellent and everyone will hope to hear this quartette again. It is regretted that space limits comment on this excellent production. Others taking part in the program were Mrs. T. Giddie, solo and recitation; Mrs. McConkey, recitation; High School Quartette; Girl's Drill; Mr. and Miss Pharis, piano and mandolin; Miss Edna Orr, solo; Mrs. McLean, solo; H. Stephenson, solo; G. M. Campbell, solo, and leader of community singing. Rev. S. R. Hunt was chairman for the occasion and enlivened the occasion with Scotch jokes. The Ladies' Aid were \$26.00 of the good after all expenses had been paid, a very satisfactory result.

B. P. O. Elks

Officers For 1930

At the last regular meeting of the above lodge, the following officers were elected for the ensuing year:

Exalted Ruler G. L. Depue
 Leading Knight J. L. Miller
 Loyal Knight H. G. Hammett
 Lecturing Knight A. W. Jopling
 Treasurer C. Rhodes
 Secretary H. Higgins
 Require W. Harris
 Inner Guard Guy T. Dow
 Chaplain L. W. Holden
 Trustees—H. E. Gill, Oscar Sletto, D. F. Melbae.
 Historian V. S. Jopling
